

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

**1. (withdrawn):** A method of removing cellulites, which comprises applying a skin with a composition comprising theanine and at least one selected from the group consisting of caffeine, genistein, L-carnitine and catechin as active ingredients.

**2. (withdrawn):** The method according to claim 1, wherein said theanine is at least one selected from the group consisting of L-theanine, D-theanine and DL-theanine.

**3. (withdrawn):** The method according to claim 1, wherein said catechin is at least one selected from the group consisting of (+) catechin (C), (-) epicatechin (EC), (-) epigallocatechin-3-gallate (EGCG), (+) epigallocatechin (EGC) and (-) epicatechin gallate (ECG).

**4. (withdrawn):** The method according to claim 1, wherein said theanine improves the expression of  $\beta_3$ -adrenergic receptor to accelerate decomposition of fats.

**5. (withdrawn):** The method according to claim 1, wherein the components are contained in an amount of 0.0001 ~20 wt% to the total amount of the composition.

6. **(currently amended):** An anti-cellulite composition for external skin application, consisting essentially of L-theanine, caffeine, genisteine, L-carnitine and catechin, as at least one active ingredients of reducing the activity of glycerol-3-phosphate dehydrogenase (GPDH), and inactive ingredients for formulating the external skin application composition, selected from the group consisting of theanine, gensiteine, L-carnitine and caffeine, and optionally catechin,

wherein the combination of theanine, genistein, L-carnitine, catechin, and caffeine is present in an amount of 0.0001 wt% to 20 wt% of the total weight of the composition, and wherein said composition removes cellulite by reducing the activity of glycerol-3-phosphate dehydrogenase (GPDH).
